

CERUS MOTOR STARTERS & VFD'S NOW AVAILABLE!

March 2011

As a leading provider of intelligent Industrial and HVAC motor controls, Cerus likes challenging conventional wisdom. Cerus is continually seeking to increase equipment life, enhance usability,

and intelligently manage energy. Cerus products are manufactured to the highest quality standards within a UL 508 facility based in Portland, Oregon.

With a 5-year warranty on most products, Cerus is committed to providing quality products. They also offer same day shipping on some of the most popular products!!!

Cerus is a welcome addition to Air Product's product line and we look forward to working with them to provide exceptional service to our customers.

Smart Starters for Smart Buildings™

Cerus' Energy Management Starter (EMS) is the most comprehensive building automation motor starter featuring option BACnet integration, metering, and over/under voltage protection.

- Ranges: 3ph, 200~600V, 1 - 200HP
- HOA Keypad with LCD Display
- Wide range electronic overload (class 1-60)
- Voltage / dry contact run inputs
- Proof of flow-true power
- Damper Control
- Fireman's override input

Variable Frequency Drives

Dual-rated for either variable or constant torque applications. Integrated communications, dual PID control and sleep mode maximize installation flexibility.

- Range: 3ph, 200~480V, 7.5 - 400HP
- 32-Character Backlit LCD Display w/ Keypad
- 8 Programmable Digital Inputs
- Analog Inputs 0-10VDC & 4-20mA
- Analog Outputs 0-10VDC
- DriveView software allows VFD to interface with a PC
- Optional 3 contactor bypass

Both NEMA 1 (indoor) and NEMA 3R (outdoor) enclosures are available. Among motor starters and variable frequency drives, Cerus also manufactures cooling towers, kitchen hood controls and industrial pump starters.

Now available in stock at Air Products! Motor Starters - Up to 10HP 208/230V or 20HP 460V and Variable Frequency Drives - Up to 25HP 460V.
